

15th European Conference on Software Maintenance and Reengineering

March 1–4, 2011, Oldenburg, Germany

<http://se.uni-oldenburg.de/csmr2011>

From Theory to Practice:

Join Our Tutorials at CSMR 2011

The Conference on Software Maintenance and Reengineering (CSMR) is the premier European conference on the theory and practice of maintenance, reengineering and evolution of software systems. CSMR promotes discussion and interaction among researchers and practitioners about the development of maintainable software-intensive systems, and the evolution, migration and reengineering of these systems.

To facilitate the implementation of research results in practical applications and bridge the gap between theory and practice, CSMR 2011 offers a variety of tutorials. Each half-day tutorial provides an in-depth presentation of its topic with a strong focus on the topic's practical relevance. The tutorials are presented by experts in their respective fields who demonstrate why and how your software can benefit from recent research results. We are pleased to offer the following tutorials at CSMR 2011 in Oldenburg:

- **IT Portfolio Management**
Elliot Chikofsky
- **Code Clone Detection in Practice**
Florian Deißeböck, Benjamin Hummel, Elmar Jürgens
- **Rapid Architecture Evaluation (RATE)**
Jens Knodel
- **Stopping Software Erosion with Static Analysis**
Rainer Koschke
- **Migrating from PL/I and COBOL to Java**
Harry Sneed

Apart from the tutorials, CSMR 2011 will host an industrial forum where companies present their technologies and success stories in software maintenance and reengineering. More detailed information about the CSMR 2011 events and program can be found on the CSMR web page.

We are looking forward to welcoming you as participants of our tutorials at the European Conference on Software Maintenance and Reengineering 2011 in Oldenburg, Germany.

Registration for CSMR 2011 and the tutorials is open now.
