Try to make smart decisions

Smart applications

Mustafo software

sanatbek@gmail.com

Telegram: @MSanatbek

Exists programs are intended to collect information in electronic version and to prepare simple report

Building

Plane

Education

Health care

And more ...

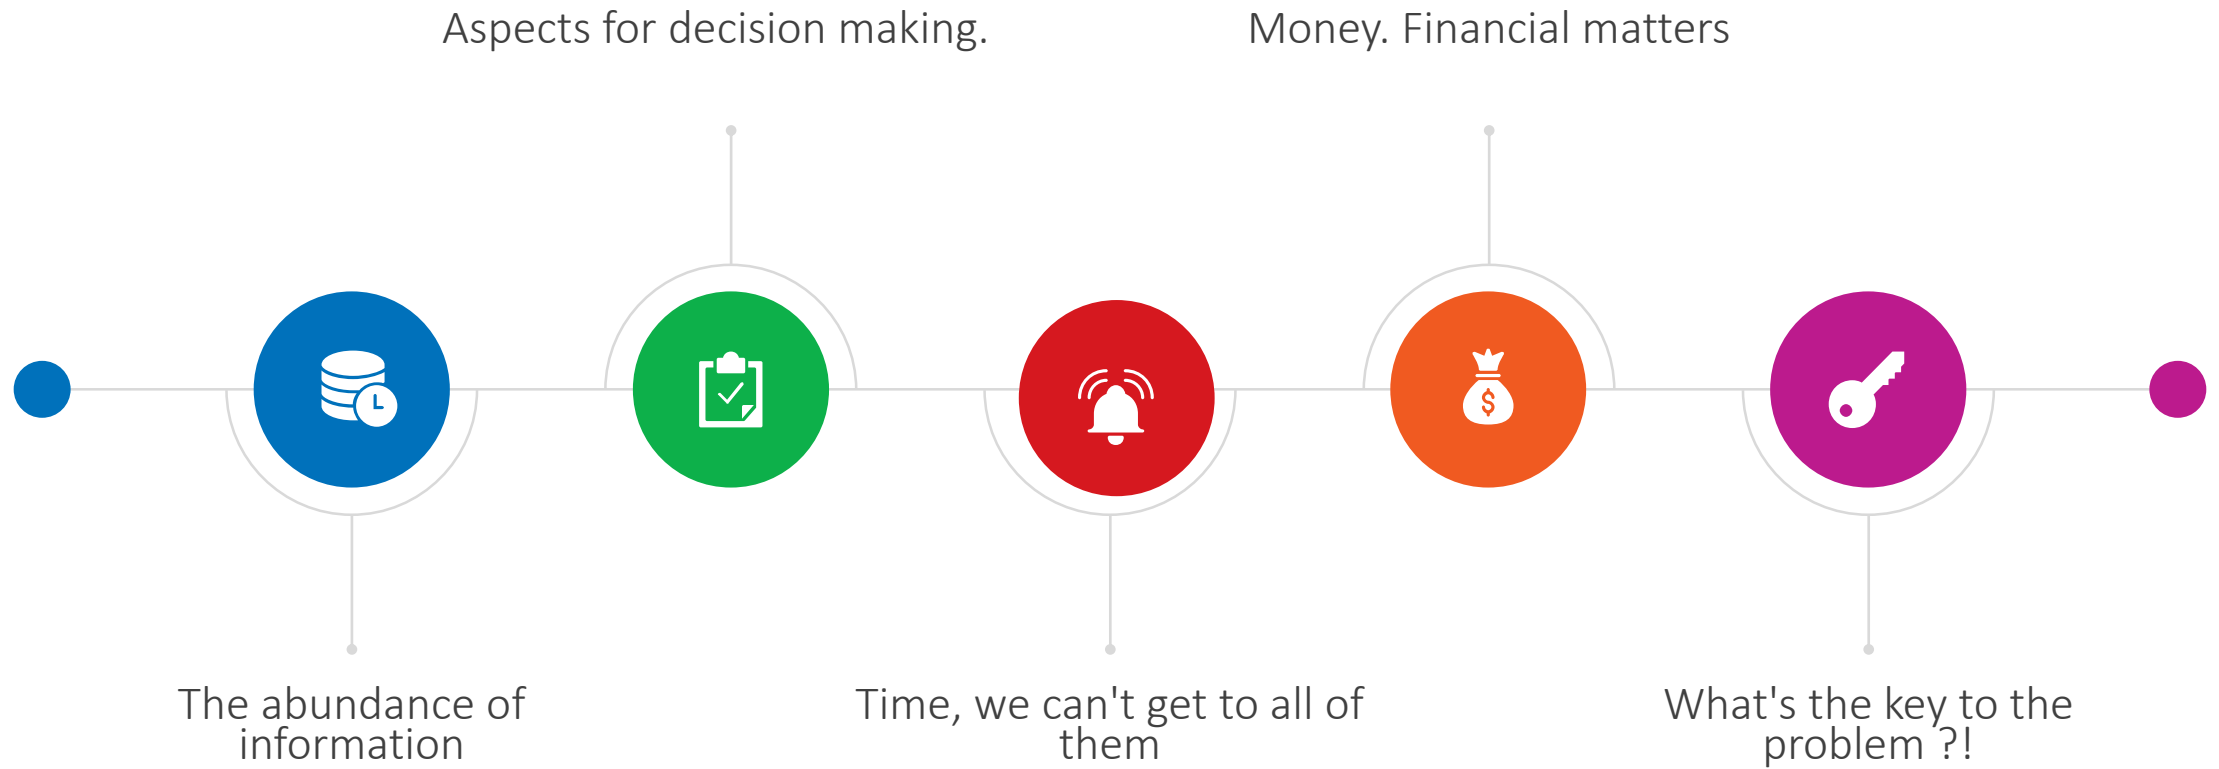

It's time to make fast decision and activity

But...

Here are some thoughts to make a decision ...

Smart applications

Smart applications are those applications that incorporate data-driven, actionable insights into the user experience. Insights are delivered in context as features in applications that enable users to more efficiently complete a desired task or action.

They often take the form of recommendations, estimates, and suggested next actions.

Smart applications can be consumer-facing or employee-facing. In some cases, the “user” is not a human, but a machine or system. In these cases, smart applications automate business and operational processes based on data-driven insights.

Smart applications

For example, retail smart applications make product recommendations based on analysis of customer buying behavior while logistics applications provide data-driven estimates of delivery times of goods and products. Healthcare smart applications offer possible patient diagnosis and treatment recommendations to clinicians based on analyses of patient and research data.

Simple applications

Health care

Registration, lab tests, doctor's consultation, reporting forms and etc

For cafes and restaurants

Receiving and ordering, payment system, booking and the like

Trade or commerce

Working with warehouses, goods, clients

Taxi Service

Calling a taxi, searching the cheapest routes to find, and remembering the routes, identifying the most popular destinations for taxis and more.

Smart school

E-journal, Electronic Diary and Parenting Messaging

Smart applications

Health care

not only collect information and stores them electronically. and on the basis of these data give some advice

For cafes and restaurants

which products are more in demand. at what price do most people afford spending money on food and etc...

Trade or commerce

when, what product should I buy and how much? which customer is reliable.

Taxi Service

Calling a taxi, searching the cheapest routes, and remembering the routes, identifying the most popular destinations for taxis and more.

Smart school

!!!

What does a smart school do?

Determine pupil's potential

Based on the student's assessments, the student's behavior and many other parameters can be determined by what subjects he has potential

Time tables of teachers.

Help them distribution of their time.

The teacher can take tests of physical fitness and development from children, but has no time for analysis

Physical training and physical development

The teacher can take tests of physical fitness and development from children, but has no time for analysis

The reasons why students leave classes

The teacher can take tests of physical fitness and development from children, but has no time for analysis

Difficult topics for pupil

Some times child's interest in learning diminishes over time. This may be due to a misunderstanding of any of the topics covered

...?

there is something else we can learn in the process

Thank you for attention!
